Sr. Software Developer *{TZ:UTC+1}*

- [x] On-Site
- [x] Remote
- [x] Hybrid (preferred)
- [x] B2B Contract
- [x] Employee
- [x] Full Time
- [ ] Part Time

Trendency Online Zrt.
Contractor - Sr. Cloud Dev 2025

Modernizing a system which has ~1200TPS, and porting it to event-based architecture

AI Tools:
Claude - Cursor IDE, Code generation
Gemini - Documentation/Specification
For me, an AI is a tool, not an enemy, or a thing I depend on.

Upwork, Andela, Turing
Freelancer Developer 2021

Led backend-heavy development projects for freelance clients, specializing in cloud migrations and transitioning software applications to cloud-based environments.

InterTicket Kft.
Research & Development Lead 2021

30 years old legacy rewrite to a scalable, ***realtime*** cloud based solution

TheNewPush LLC.
Lead Sowftware Developer 2017

Provide a low-code BPMN based platform to optimize/simplify business workflows in the US based healthcare insurance solution.

TheNewPush LLC.
Chief of Research & Development 2019

Cloud based GRC solution which federates Identity management, governance, and Risk/Compliance management

InfoCompass Kft.
2015 *Development Lead*

As a contractor of SAP we made Hana Cloud Platform based solutions using SAP's HANA database

Pont Rendszerház Kft.
2014 *J2EE Developer*

Developing Bank of Budapest's Electronic Document Management system, using Java's EE framework

ThinkPad

Húsipari Vállalat Zrt.
2011 *J2EE Architect*

Create and develop an ERP+CRM software for track the lifecycle of the production, and manage sales

Welt 2000 Kft.
Java/PHP Developer 2009

Develop the customer facing of the EU's competition system using PHP, later Java

My language stack
ordered by relevance

go *for Backend*	***8*** *years experience*
React *for Frontend*	***8*** *years experience*
node.js *for Backend*	***9*** *years experience*
Flutter *for Mobile*	***3*** *years experience*
Python *for ML/AI*	*Started using **2** years ago*
Rust *for WASM*	*Started using **1** year ago*
Java *for Enterprises*	***12*** *years experience*

Technical Stack _ Javascript

GraphQL/REST/gRPC - APIs

WebSocket, SSE, connect-rpc - Realtime web communication

Redis - Distributed caching

GCP, Azure, Self-Hosted - Cloud Providers

docker-compose, Nomad, **Kubernetes** - Orchestration platforms

Kong, nginx, Apisix - Ingresses

Istio - Service mesh

Docker, **Podman** - Container platforms

MinIO, Radosgw, Google Storage, S3 - Cloud storage platforms

Github, GitLab, CircleCI, Jenkins - CI/CD Pipelines

ArgoCD, Helm, Helmfile - Deployment tools

PostgreSQL, Cassandra, MySQL, Oracle - Relational databases

Redis, **MongoDB**, CouchDB, ElasticSearch - Document based databases

Prometheus, **InfluxDB**, Graphite - Time series databases

Kafka, NATS, RabbitMQ, **Pulsar**, SNS, PubSub - Messaging / Eventing

SSG, **SSR**, SPA, PWA - Frontend outputs

Tailwind, MUI, HeroUI, Bootstrap - UI frameworks

OpenTelemetry, *OpenTracing* - Distributed tracing, metrics

Prometheus, Alertmanager, Grafana - Monitoring

Gemini, Anthropic (claude) - AI providers

And a lot more...

Technologies

used in node.js

Nest.JS, **Next.JS**, **React.js**, **TypeScript**, Vite, TailwindCSS, SASS, Express.js, Passport.js, Firebase Admin SDK, TypeORM, Prism, class-transformer, class-mapper, Kafka.js, Redis, Pulsar, gRPC server/client, Elastic APM, morgan, winston, mongoose, heroui

Technologies

used in Frontend (js)

React.js, Redux, Redux Toolkit, MUI, Ant, Tailwind, react-dnd, d3, Firebase, react-icons, connect-rpc, moment, date-fns, OAuth2, framer-motion, AOS, GASP, Lottie, react-query, tanstack-table, reactgrid
